TERRARIUM

Terrarium kit

Kit Insect

Terrarium kit for insects
25x30x30 cm - 3 mm

Included:

- Natural coco substrate
- Natural cork hide

Full glass terrarium with top sliding door.
Easy to use and clean.

Kit insect
25x30x30(H) cm
SKU: RP121160

Very appealing glass terrarium design!

The perfect kit to start insects like beetles or spiders.

Tortoise Kit

Fully equipped terrarium
Available in 3 sizes

Designer glass terrarium.
Easy to use.

Tortoise Kit
- Limited edition
60x40x28(H) cm
SKU: RP121161

Tortoise Kit
- Limited edition
80x45x30(H) cm
SKU: RP121158

Tortoise Kit
- Limited edition
116x52x33(H) cm
SKU: RP121159

Includes :

- Lighting spot
- Heat bulb
- Natural coconut substrate
- Plastic feeding bowl
- Tortoise food
- Nutritional supplement for tortoises

A glass terrarium design!

**NEW
PRODUCT**

Presentation visuals are non-contractual.

Gecko Kit

**NEW
PRODUCT**

Complete gecko kit with a glass terrarium!

Fully equipped terrarium with front-opening doors
45 x 45 x 45 cm

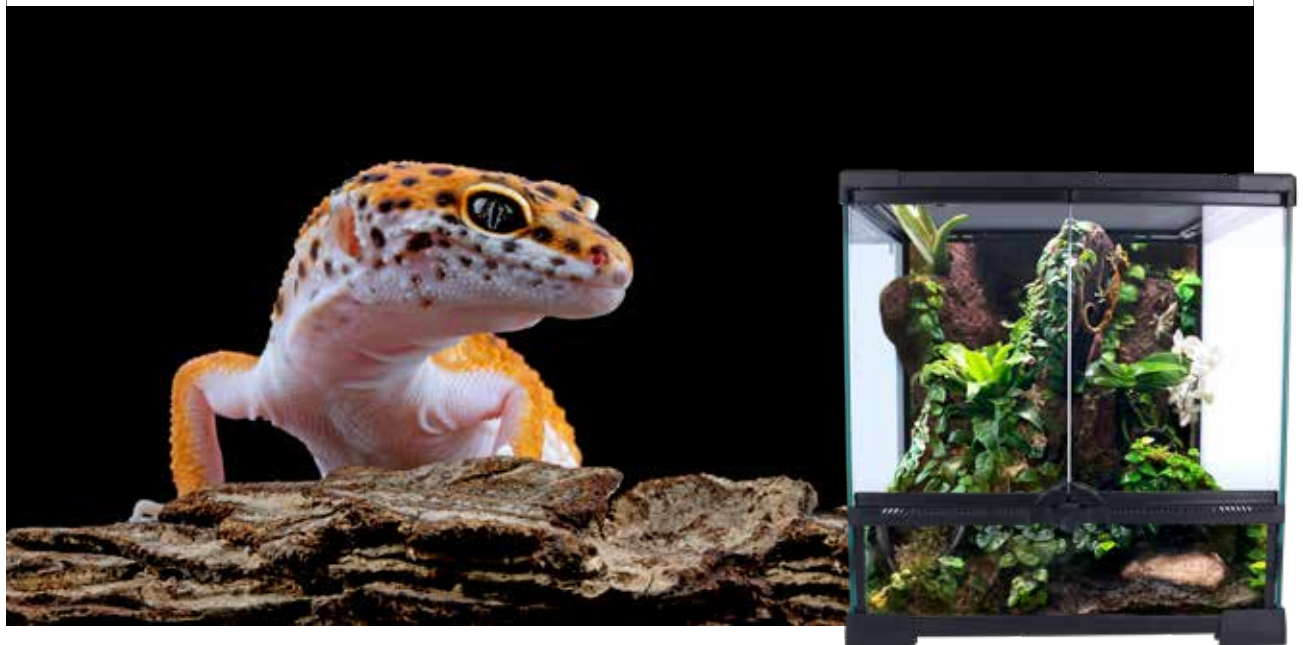

Included:

- Lamp holder
- UV bulb
- Heating mat
- Thermometer
- Hide
- Feeding bowl

Gecko kit
45x45x45(H) cm
SKU: RP121172K

*Give your gecko the perfect habitat!
Ideal for getting started with peace
of mind!*

Premium Modular Habitat

■ Premium Modular Habitat

76,2 x 30,5 x 30,5 cm

Premium Modular Habitat
76,2 x 30,5 x 30,5 (H) cm
SKU: RP122120

« Ideal for reptiles and small animals. »

- Give your pets a habitat that is as stylish as it is functional.

Made from high-quality glass, this premium habitat is fully knock-down, making it ideal for seasonal use: perfect indoors during winter, then easy to disassemble when your animals move back to the garden in warmer weather.

- Versatile and practical, it is suitable for tortoises, many reptile species, and small mammals alike.

- Its open-top design, fitted with protective mesh covers, provides easy access for feeding and maintenance while keeping animals safe from predators and young children.

Detachable glass terrarium

■ Repti Scape

Detachable glass terrarium

- Repti Scape is a DIY terrarium made of aluminum and glass. Its waterproof base allows it to be used both as a paludarium and as a tropical terrarium.
- Strategically placed lower and upper aluminum vents maximize airflow inside the enclosure.
- Cable ports make it easy to install electrical equipment inside the terrarium.
- A lock is integrated into the door to keep your animals secure.
- The raised base allows the installation of heating mats underneath the enclosure.

■ Premium Breeding box

This plexiglass breeding box is ideal for snakes, amphibians, insects or other small animals.

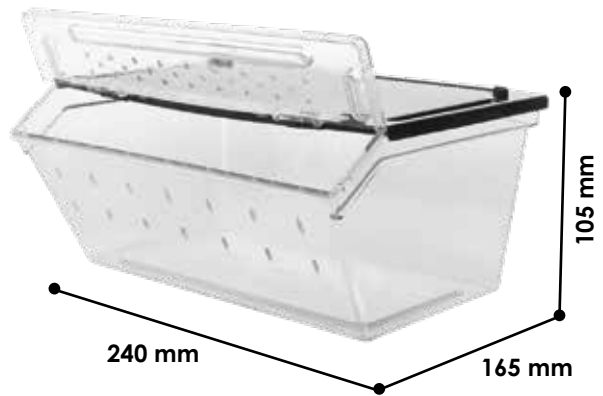

This breeding box is equipped with :

- a closing system.
- of lugs allowing them to be stacked.
- a small front door that can be opened even if the boxes are stacked (practical for feeding).

Premium Breeding Box

Dim : 24x16.5x10.5 cm
SKU: RP875972

■ Breeding Box for Reptiles or Insects

Transport, breeding and feeding box for reptiles and amphibians.

- Ideal for storing live food or temporarily in a quarantine zone.
- Sturdy and practical box with ventilation systems on the sides.
- Partial opening for feeding or cleaning.
- Can also be used to transport reptiles between the home and the veterinary.

Reptile or Insect Breeding Box XS

Cage Terrariums (flat packed)

■ Naturarium

« Made of wire netting, our Naturariums are easy to install and available in three sizes. Assembly takes a few minutes. »

- Quick and easy assembly (5 to 10 minutes).
- Can be used indoors or outdoors.
- Robust nylon mesh.
- Optimal ventilation.
- Escape-proof.
- Plastic tray included (for the substrate).
- Several openings.
- Integrated cable pass-through.
- Reinforced nylon loop to hang up the vivarium.

The zip system allows the Naturarium vivarium to be opened fully or partially. A small door has been added at the front so that an arm can pass through to feed, remove droppings or catch an animal without escaping. Naturarium is used by many breeders or wholesalers because it is a practical and versatile vivarium for indoor or outdoor use.

In your home

Your Naturarium is perfectly suited for housing reptiles that require good ventilation. This is the case for chameleons, and many lizards and snakes. Naturarium is also suitable for the breeding of stick insects and butterflies. Integrated cable passage: a small window on the top and a carabiner will allow you to install a lamp holder and pass its cable through, without an animal being able to escape. You will easily be able to diffuse UVB (Megason, Ultrason lamps) in your Naturarium. An included plastic tray will allow you to add substrate without it passing through the nylon.

Outdoors

By hanging your Naturarium under a tree on a beautiful sunny day, you will allow your reptiles to take full advantage of the sun's UV rays, but also to immerse them in the surrounding nature.

Naturarium S
(45x45x75cm)
SKU: RP876116

Naturarium M
(75x45x75cm)
SKU: RP876118

Naturarium L
(75x45x120cm)
SKU: RP876120

Terrarium cages (flat-packed)

« For your reptiles' sunbathing or for a walk in nature, it unfolds in 3 seconds! »

■ Repti explorer

- For indoor or outdoor use.
- Compact, easy to carry.
- Nylon mesh more durable than competitors.
- Escape-proof.
- Optimal ventilation.
- Plastic tray included (for substrate).
- Multiple openings.
- Integrated cable pass-through.
- Reinforced nylon loop for hanging your vivarium.

Repti Explorer L
(62x92cm)
SKU: RP876114

Enclosures for Tortoise (flat-packed)

■ Tortoise Park

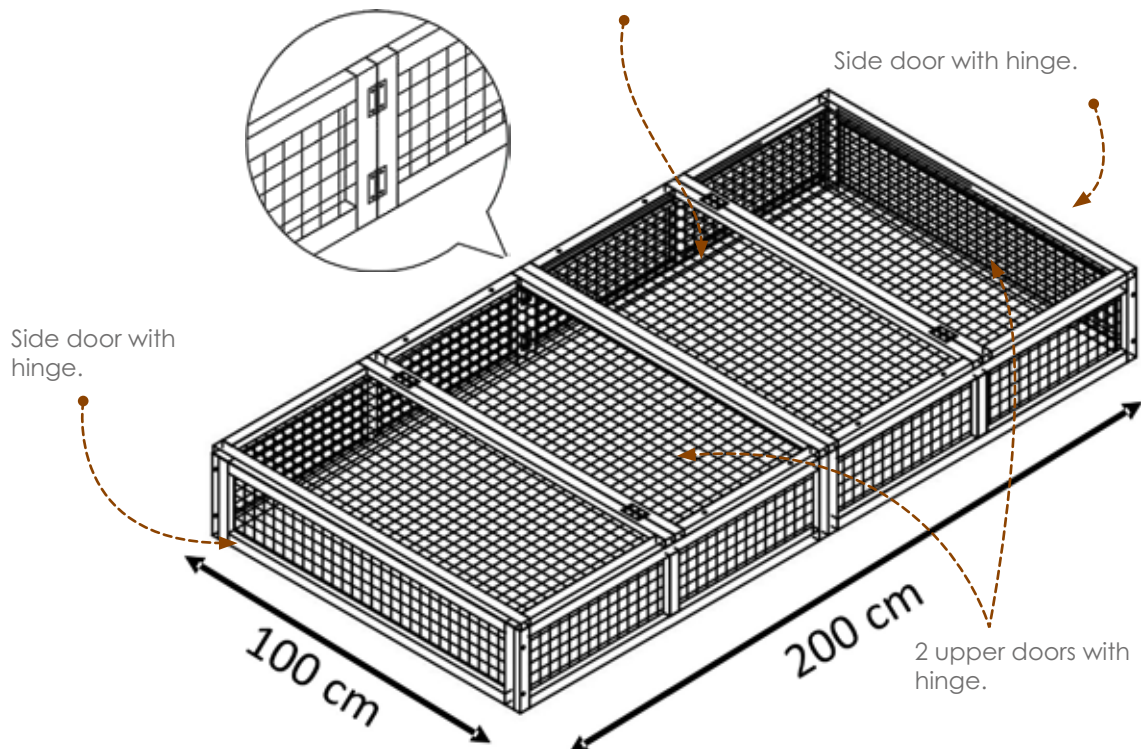

Tortoise Park
Outdoor turtle enclosure
200 x 100 x 25 (H) cm
SKU: RP876030

« An easy-to-assemble enclosure which allows tortoises to eat natural grass and benefit UV. »

The brackets to connect two enclosures are being supplied.

The foldable system can create an enclosure of 200 x 100 cm (but the packing box is compact and is only 100 cm long!)

« Possibility to connect as many sets as you want, by buying several ones. (The brackets are included.) »

« Example of two Tortoise Park connected. That is 4 m² of enclosure. Enough to make our turtles happy. Some Customers report to us that they have connected 5 enclosures to create a secure area of 10 m². »

■ Tortoise Park Cover

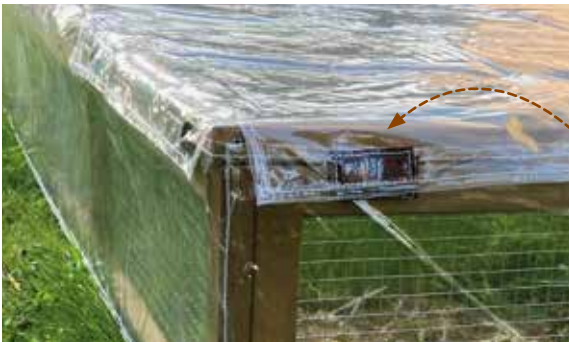

Tortoise Park Cover

SKU: RP876031

« Tortoise Park Cover allows your turtle to enjoy natural conditions all year round without risk. Whether for hibernation, or simply for spring or autumn. It is humidity and rain that causes rhinitis. »

The flaps and scratches ensure a perfect waterproofness whatever the season. Humidity is what causes rhinitis.

The tarpaulin system allows easy opening from the top.

AQUARIUM - TERRARIUM

ACCESSORIES FOR AQUATIC TURTLES

Aquatic Turtle Substrates

« Mix of natural colours. »

■ Turtle Stones

The Reptile-Planet's **Turtle Stones** are made of small smooth river stones that have been rounded by time in mountain streams. These smoothly contoured pebbles prevent turtles living in the depths or looking for food from injuring themselves. Variations in colour and pattern produce a natural-looking riverbed. Turtle Stones Reptile-Planet pebbles are easy to clean and reuse by soaking them with disinfectant in a large bucket of water for 15 minutes and then rinsing them until the water is clear.

- Rounded pebbles.
- Create a natural-looking riverbed.
- Easy to clean.

Turtle Stones
4,5KG
SKU: RP875841

Aquatic Turtle Heater

■ Aquatic Turtle Heater

« A thick plastic cover protects the heating element, as turtles often drop stones. »

Heater for aquatic turtles

Reptiles-planet Aquatic Turtle Heater for aquarium maintains a perfect water temperature for aquatic turtles and most aquatic reptiles and amphibians. A mounting bracket is included with two large size suction cups for easy installation in any aquatic habitat.

Available in two heating power to choose according to the size of your aquarium.

- Aquatic Heater 25 W : max 40 L.
- Aquatic Heater 50 W : max 70 L.

Up to 20 gallons

TERRARIUM
Up to 36"

FLOW RATE:
350 L/H

3.8x3.8x8"

Turtle Filter
SKU: RP122510

« Turtle Filter is a safe and powerful filter for turtle aquariums. Its bottom intake, oxygenating waterfall effect, and replaceable cartridge ensure clear and healthy water at all times. »

Internal corner filter for aquatic reptiles

- The Turtle Filter is a high-performance filtration system specially designed to meet the needs of freshwater turtle aquariums, which are known for producing a large amount of waste and requiring perfectly clean, well-oxygenated water.
 - Its bottom intake system, equipped with wide openings, efficiently captures heavy debris, food leftovers, and waste directly where they accumulate. The water is then filtered through an easy-to-replace cartridge, providing optimal mechanical and biological filtration without complicated maintenance.
 - The waterfall-style outflow does more than simply return water to the aquarium: it creates natural circulation and oxygenation, essential for the well-being of turtles and the biological balance of the tank.
 - An integrated protective grille prevents turtles from accessing the filter's moving parts, ensuring completely safe use, even with curious or young animals.
 - With a flow rate of 350 L/h, the Turtle Filter is perfectly suited for the Turtle Kit 100 (approximately 45 liters), ensuring clear, healthy, and odor-free water every day.
- Turtle Filter is filtration designed specifically for turtles: powerful, safe, and easy to maintain.

■ Filter cartridges for Turtle Filter

- Set of 3 chemical filter cartridges.
- Ensure clean and healthy water for your turtles, easy to replace.
- Recommended replacement every 4 weeks.

Filter cartridges x3
for Turtle Filter
SKU: RP122511

LIGHTING WITH UVA-UVB

Energy saving lamps UVA-UVB

■ **Mega Sun 2.0**
(Low UVB radiation)

« Mega Sun 2.0 emits a low level of UV, ideal for nocturnal or sensitive species. It promotes well-being and natural activity without the risk of overexposure. »

The Mega Sun 2.0 range is specially designed for reptiles and amphibians requiring low UVB output, such as nocturnal, crepuscular, or shade-dwelling species. It emits a gentle and controlled radiation, ideal for respecting the sensitivity of these animals while supporting their biological balance.

The moderate UVA output promotes natural activity and overall well-being, while the low UVB level helps maintain a healthy metabolism without the risk of overexposure. Mega Sun 2.0 allows you to create a reassuring lighting environment, close to naturally shaded conditions.

Easy to integrate into all types of terrariums, Mega Sun 2.0 is a reliable solution for providing suitable, respectful, and safe lighting, perfectly compatible with a heat source such as the Neo Day Eco range.

Available in 13 W and 26 W.

2.0 - 13W
SKU: RP121675

2.0 - 26W
SKU: RP121676

■ Mega Sun 5.0
(medium UVB emitter)

« Mega Sun 5.0 provides a balanced supply of UVA and UVB, suitable for tropical reptiles. It supports vitamin D3 synthesis and contributes to overall good health. »

The Mega Sun 5.0 range has been developed to meet the needs of tropical reptiles living in partially sun-exposed environments. It provides an optimal balance of UVA and UVB, supporting activity, natural behavior, and proper calcium absorption.

The UVB emitted actively contributes to vitamin D3 synthesis, which is essential for bone development and the prevention of deficiencies. UVA, in turn, stimulates appetite, interaction with the environment, and overall reptile well-being.

Versatile and designed for daily use, Mega Sun 5.0 helps recreate a lighting environment close to natural conditions. Combined with a suitable heat source, it offers a complete solution for the long-term maintenance of tropical reptiles in terrariums.

Available in 13 W et 26 W.

5.0 - 13W
SKU: RP121677

5.0 - 26W
SKU: RP121678

■ Mega Sun 10.0
(strong UVB emitter)

« Mega Sun 10.0 delivers high UVB output for desert reptiles. It promotes proper calcium absorption and healthy bone development. »

The Mega Sun 10.0 range is designed for reptiles originating from highly sun-exposed environments, such as desert or semi-desert species. It delivers a high level of UVB radiation, essential for these animals to ensure efficient vitamin D3 synthesis and optimal calcium absorption.

This intense UV output supports proper skeletal development, strong bone structure, and overall health. The emitted UVA stimulates natural behaviors and sustained activity, which are essential for the well-being of reptiles that are naturally exposed to high light levels in their native habitat.

Developed to recreate conditions close to direct natural sunlight, the Mega Sun 10.0 integrates perfectly into desert setups, alongside a heat source such as the Neo Day Eco range. It provides a reliable and high-performance solution for reptiles with high UV requirements.

Available in 13 W et 26 W.

3 701661 226149

« *Ultrasun is a 3-in-1 bulb combining heat, light, UVA, and UVB. It creates a basking spot and supports vitamin D3 synthesis for a natural and healthy environment.* »

The Ultrasun range offers 3-in-1 bulbs specially designed for tropical, desert, and Mediterranean reptiles. These mercury vapor lamps combine heat, visible light, UVA, and UVB in a single source, effectively reproducing the natural solar radiation essential to animal well-being.

The UVB emitted by Ultrasun bulbs supports vitamin D3 synthesis, which is essential for calcium absorption and proper development of bone and keratin structures, particularly in tortoises. UVA promotes activity, stimulates natural behaviors, and helps reduce stress, while enhancing the colors of both reptiles and décor.

By delivering heat and UV simultaneously, the Ultrasun range

allows the creation of a basking spot within the terrarium. This targeted warm area helps reptiles regulate their body temperature instinctively, supporting digestion, activity, and overall physiological balance. This type of lighting is especially suitable for diurnal species requiring combined heat and UV output.

Ultrasun bulbs are self-ballasted and screw directly into an E27 socket, without the need for an external ballast. This ease of installation makes them compatible with most lamp holders used in reptile keeping, facilitating integration into various terrarium setups.

Available in several wattages, Ultrasun bulbs adapt to different terrarium volumes and the specific

needs of reptiles, whether small or large.

Choosing the Ultrasun range means opting for a complete and high-performance lighting solution that combines heat and UV, providing reptiles with a more natural, healthy, and comfortable environment.

LAMP HOLDER

Lamp holders (ceramic socket)

■ Repti Socket

Repti Socket
SKU: RP876106

- Porcelain socket with electrical wire and switch.
- Can be used for bulbs, spotlights, ceramic lamps and UV lamps (for example Mega Sun, Neo Day, UltraSun) with E27 lamp holder.
- Maximum power: 200 W.
- Quick and easy installation.

■ Repti Socket Pro

Repti Socket Pro
SKU: RP876107

« Model equipped with a bracket with adjustable angle. »

■ Elegance Socket 200 W

Specifically designed to be installed inside Elegance terrariums. The included screws allow installation in just a few minutes without drilling holes in the mesh.

« A small product with great features! »

**Elegance Socket
Lamp holder**
SKU: RP876108

Fully articulated to tilt the lamp.

Pre-wired with an on/off switch, ready to use.

Ceramic socket compatible with all bulbs up to 200 W.

Twice as many ventilation holes to protect the lamp from overheating.

Supports high-power bulbs: UltraSun 160 W, InfraRed 150 W, or Terra Ceramic 200 W (E27 sockets).

The dome covers but does not enclose the lamp to protect it from overheating. Heat is properly dissipated.

Mounting system for the Elegance terrarium mesh lid.

200 W

« Clamp lamp holder with standard porcelain socket E27. »

■ Tortoise Clamp Lamp

The Tortoise Clamp lamp holder has been designed to illuminate open tortoise terrariums. It is not a lamp holder for aquariums. Compatible with Reptiles-Planet lamps (up to 200W).

Tortoise Clamp Lamp
SKU: RP870843

■ Megasun Canopy

Compact (or energy-efficient) lamp holder.

Megasun Canopy is designed to hold the UVA-UVB MegaSun 13 and 26W compact lamps, as well as most of E27 energy saving bulbs.

Megasun Canopy
SKU: RP870844

Discreet, the megasun canopy in a top gridded Terrarium

Inside an Elegance terrarium thanks to the included screws (no need to make holes!).

The Megasun Canopy with the Aqua terra range

Fixing bracket for Aqua Terra, or Open Turtle Terrarium.

Mega Sun

The Megasun Canopy can be used with all lamps in the Mega Sun range.

■ Twindome 14

- 2 holders in 1 (one for lighting and one for heating).
- The Twindome enables you to use an Ultrasun 80/100 W lamp or a Neo Day Eco 100 W lamp for lighting and an Infrared 100 W lamp or a Terra Ceramic 100 W lamp for heating. Perfect for MegaSun products.
- Includes two on/off switches to separately control heating and lighting.

Twindome 14
(D14 x H16cm)
SKU: RP890614

■ Twindome 16

- The Twindome 16 lamp support has been designed to be placed or hung above wire mesh vivariums.
- Can be used with lamps up to 200 watts (2 x 200 W).
- Two lamp holders in one (one for lighting, one for heating).
- The TwinDome can operate an Ultrasun 80 W lamp or a Neo Day 100 W for lighting, but also an Infrared 100 W or Terra Ceramic 100 W for heating.
- Separate control of heating and lighting possible via two power cords.
- Two switches.

Twindome 16
(D16 x H19cm)
SKU: RP890615

Clamp Lamp

■ Black Clamp Lamp

The "Black Clamp Lamp 14" can be used inside or outside the vivarium. Exterior matt black exterior, interior white reflector. The clamp for hanging on the branches is removable. Max 100 W.

New Wider Model with ventilation holes. No protective grid.

In view of the growing demand for Ultrasun lamps, we had to create a model capable of accommodating the 80 and 100 W models while being compact. We therefore worked on the shapes and added ventilation to protect the lamps from overheating.

Black Clamp 14
Lamp holder with clamp
(D14 x H16cm) Max 100 W
Protection grid not included
SKU: RP870845

- Can be used inside or outside the vivarium. The clamp for hanging on branches is removable. Max 200 W. The Black Clamp Lamp Holder Lamp 16 has been designed to hold the Megasun 26 W lamps (or any other 26 W compact lamp). It can therefore be placed on top of the terrarium without the lamp touching the terrarium grid.
- This model can also be fitted with 70, 80 and 100 W Ultrasun lamps, the Terra Ceramic 150 W and all Neo Day lamps. Although it supports up to 200 W, its width does not allow it to accommodate the Ultrasun 160 W. For ceramic lamps, models up to 150 W can be used. Warning: This model is delivered with the clamp but without the protective grid.

Black Clamp 16
Lamp holder with clamp
(D14 x H16cm)
Protection grid not included
SKU: RP870852

Black Clamp 18
Lamp holder with clamp
(D18 x H21cm) Max 200 W
Protection grid not included
SKU: RP870853

- Can be used inside or outside the vivarium. The clamp for hanging on branches is removable. Max 200 W. No protection grid.
- The Black Clamp Lamp 18 lamp holder has been designed to accommodate ALL bulbs of the Reptile-Planet range up to 200 W power. Its new shape has been designed to combine compactness and compatibility.
- This model is delivered without protection grill (optional, see below).

Black Clamp 22
Lamp holder with clamp
(D22 x H24.5cm) Max 200 W
Protection grid not included
SKU: RP870850

- Can be used inside or outside the vivarium. The clamp for hanging on branches is removable. Max 200 W. No protection grid.
- The Black Clamp Lamp 18 lamp holder has been designed to accommodate ALL bulbs of the Reptile-Planet range up to 200 W power. Its new shape has been designed to combine compactness and compatibility.
- This model is delivered without protection grid.

■ Protection Grid

**Protection Grid
for Black Clamp 14**
(D14.6cm)
SKU: RP870846

**Protection Grid for
Black Clamp 18**
(D18.6cm)
SKU: RP870854

■ Reptidome

Reptidome 14
(D14xH18.2cm)
Max 100 W
SKU: RP870865

The Reptidome lamp holders are designed to be placed on top of wire terrariums. The small lugs at the bottom of the dome have two functions: First, they prevent the dome from coming into direct contact with the terrarium grid (safety in case of overheating), and second, they allow the heat from the lamp to escape. Overheating can break the lamp. Equipped with a ceramic socket. The hook allows suspension with for example Repti Lamp Holder.

Reptidome 22
(D22 x H24cm) Max 200 W
SKU: RP870870

■ Repti Lamp Holder

« Adjustable suspension system for tortoise. »

Repti lamp Holder allows you to hang a Reptidome type lamp holder to distribute UV light to tortoise in open terrariums. It can also be used to safely distribute UV light over closed terrariums if they are wire-meshed.

Repti Lamp Holder
SKU: RP870842

MISTING

Misters

■ Rainforest Mini 2.2L

Programmable Automatic Mister

- Simulates rainfall and perfectly regulates humidity for a healthy tropical terrarium.
- Easy adjustment of spray interval, duration, and flow rate to recreate a natural microclimate.
- Integrated 2.2 L reservoir, easy to refill from the top.
- Quiet pump and stable anti-vibration design, ideal for discreet operation.
- Easy installation: 2 to 4 adjustable nozzles, flexible tubing, and quick-connect fittings.

« Mister for tropical terrariums with a 2.2 L reservoir and 2 included nozzles. Adjustable duration, intensity, and frequency. Top-fill design. Ideal for 1 small to medium terrarium. »

■ Repti Drink (with pump)

« Reptile water fountain »

Many reptiles do not recognize a water source if it is stagnant. Thanks to the constant water movement in this drinking fountain, which flows from the top to the bottom of the bowl, reptiles are encouraged to drink more, keeping them hydrated and healthy.

- Provides a continuous source of fresh, clean water.
- Encourages reptiles to drink.
- Increases humidity levels.
- Easy to install and clean.
- Filter foam infused with activated carbon.
- Pump included.

Repti Drink (Reptile Water Fountain)

SKU: RP871025

Spray bottles

■ **Repti Spray Easy**

Portable and rechargeable 300 ml spray bottle.

- Produces a fine mist for quick and effortless spraying.
- Excellent for the daily hydration of your reptiles and their habitat.
- Helps maintain optimal conditions inside the terrarium.
- Easy to use: ergonomic design, durable crimping, practical, and cost-effective.

Repti Spray Easy
SKU: RP875949

■ **Reptispray 2,5L**

- Professional sprayer.
- Adjustable metal nozzle (fine misting).
- 2.5 L heavy-duty tank.

Reptispray 2.5L
SKU: RP875948

HEATING

Heat Cables

■ Repti Flex

Heat Cables increase the temperature of the whole vivarium for a modest investment.

- Four power levels to meet your specific needs.
- Easy to install with numerous possibilities.
- Excellent to create a temperature gradient.
- Watertight (silicon-covered to avoid hardening).

NB : Avoid leaving the cable wound or tightly on the floor, as this could crack the bottom of your vivarium. Distribute the heat on the floor.

Ceramic Lamps

■ Terra Ceramic

The ceramic lamp is the most efficient heating element in Terrariophilia. In natural environments, animals are used to feeling heat coming from above. This heat can also warm stones, or other decorations in the vivarium and act by reflection.

- Innovative design, 99% heat efficiency.
- Produces infrared heat similar to the sun's.
- Does not emit light in order to respect the photoperiods (day and night).
- Sturdy ceramic built adapted to humid environments.
- Proven useful lifetime of over 25,000 hours!

Infrared Lamps

■ Infrared

The Reptiles Planet Infrared bulb for terrarium is the ideal solution to provide your reptiles with a constant and natural heat source, both day and night.

Designed to simulate the warmth of tropical or desert environments, it supports the well-being, digestion, and thermoregulation of cold-blooded animals.

Thanks to its soft red light, this bulb does not interfere with your reptiles' day/night cycle, making it an excellent choice for nighttime use. Strong and durable, it is made from reinforced glass, resistant to heat and humidity. Easy to install, it fits all standard E27 ceramic sockets.

This bulb is suitable for many reptile and amphibian species: geckos, snakes, bearded dragons, tortoises, chameleons, and many others.

Provide your animals with a comfortable and secure environment by installing this infrared bulb in their terrarium. It will quickly become an essential element for their health and well-being.

Heat Plates

■ Repti Mat

« With safety circuit breaker and variator. »

The heat plates are used to create hot spots and facilitate the digestion of the animals. The contact temperature of a plate is about 30 to 40°. It emits radiant heat that penetrates the animals' bodies and activates their metabolism. All our heating mats are equipped with a 50°C cut-off switch which cuts off the power supply to the heating mat in the event of overheating. This circuit breaker is not as sophisticated as a thermostat, but it has been designed to limit the risk of fire in case of misuse of the product. Since 2020, all our heating mats are equipped with a temperature variator.

SUBSTRATE

Substrate accessory

■ Sand and substrate scoop

Sand and substrate scoop

SKU: RP890064

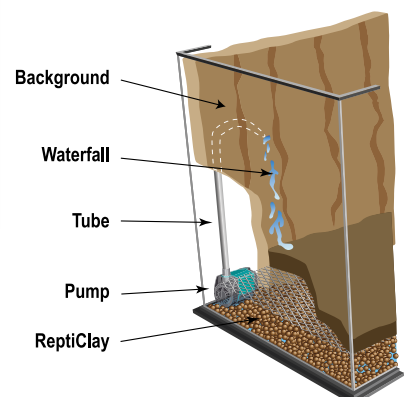

- This scoop-scraper allows you to clean the sand in your terrarium quickly and efficiently.
- Its wide, low-profile design allows easy access to corners.
- The mesh is designed to let sand pass through but not waste.

Accessorie for Tropical Climate Substrates

■ Repti Mesh

- Non-toxic mesh for terrariums. Placed over the substrate layer to allow proper water drainage, prevent substrates from mixing and to avoid contaminating the water or filtration systems.
- Excellent results when combined with a waterfall (see schematic).
- For large terrariums, use several pieces to cover the surface.

SKU: RP120048

Repti Mesh 50x120 cm

SKU: RP120049

Tropical Climate Substrates

■ Repti Forest Bedding

« Substrate close to blond peat. »

Repti Forest Bedding (6 L)
SKU: RP440100

Repti Forest Bedding (18 L)
SKU: RP440105

Repti Forest bedding consists of rich organic materials from ground coconut shell fibres. This substrate is completely natural, environmentally friendly and biodegradable. It is the ideal substrate for creating terrarium layouts with natural plants for reptiles, amphibians and invertebrates seeking moisture.

Moreover, thanks to its water retention capacity, its antifungal properties and its ability to aerate the roots, this substrate contributes to the growth of plants in your terrarium.

- 100% natural substrate with low PH (5 to 6).
- Reconstruction primary forest floor.
- Keeps the soil moist but healthy (no mould).
- Provides a nutritious substrate for living plants.
- Ideal for any natural terrarium design.
- Absorbs unpleasant odours and is heat-sterilised.

■ Repti Forest Bedding Compressed

The compressed coconut humus turns into a kind of peat when the brick is dipped in water. The brick will gain 7 to 8 times its volume.

This acidic humus is ideal in terrariums as it limits bacterial development and promotes plant growth (aeration and water retention favouring rapid root and plant growth).

5Kg = Up to 60 litres of coconut fibre with 30 liters of water.

650 g = Up to 9 litres of coconut fibre with 4 liters of water.

- pH value between 5.0 and 6.0 (no mould).
- Heat-sterilised, without fungus or germ.
- No additives, 100% natural.
- Renewable resources.
- Economic.

Repti Forest Bedding Compressed 5kg
SKU: RP890582

Repti Forest Bedding Compressed 650g
SKU: RP890580

« Compressed coconut humus.
For all types of tropical vivariums. »

Tropical Climate Substrates

■ Terrarium Peat
Blond peat.

« Tropical humid environment (65 to 100% humidity). »

Essential substrate for creating a natural terrarium requiring high humidity.

The acidity of the peat limits bacterial development even at 90% humidity. Peat can also be used as an incubation substrate for reptile eggs. Peat can also be placed on a draining substrate (on top of clay balls).

Terrarium Peat 6L
SKU: RP550010

Terrarium Peat 18L
SKU: RP550012

■ ReptiClay 6L

« Suitable for small burrowing species. Aesthetic and natural appearance. »

ReptiClay 6L
SKU: RP875798

Can be used as is without being covered by another substrate. Plants have a good anchoring base in the 2–3 mm particles. They will either grow into an exuberant jungle or become fresh food for animals (pogona, tortoises, uromastix, iguanas, etc.).

The ReptiClay substrate is made from natural clay with no added colorants or chemical substances. ReptiClay is produced through a special firing process at up to 1200°C with the addition of water, which removes harmful germs and gives it its specific properties.

It is used for waste breakdown and biotope improvement: the terrarium is an artificial environment in which plants and animals must

recreate their bioclimatic habitat. The porous structure of HydroClay allows the establishment of beneficial bacteria that break down waste. Our substrate enables you to create a natural vivarium requiring little human intervention. In addition, a clay soil significantly reduces odors in the terrarium.

The ReptiClay substrate is ideal for your animal's hibernation. It helps create a stable bioclimatic environment free of parasites. The substrate breathes while maintaining the necessary humidity and temperature.

ReptiClay is also used for natural incubation of reptile eggs as it prevents (or limits) mold formation. ReptiClay quickly absorbs large amounts of water and gradually releases it back into the air.

Tropical Climate Substrates

■ Hydroclay 6L

Hydroclay 6L
SKU: RP875936

« An excellent
drainage
substrate. »

Hydroclay is placed at the bottom of a tropical vivarium, then covered with a fine mesh to prevent mixing of substrates (Terra Mesh or equivalent), followed by an acidic substrate such as blonde peat (Terrarium Peat), coconut humus (Terrarium Humus), or smaller clay balls (ReptiClay).

It is used for waste decomposition and biotope improvement: the terrarium is an artificial environment in which plants and animals must recreate their bioclimatic habitat. The porous structure of HydroClay allows the establishment of beneficial bacteria that break down waste. Our substrate enables you to create a natural vivarium requiring minimal human intervention. In addition, a clay soil significantly reduces odors in the terrarium.

It is an exceptional filtration system: 4 bags of HydroClay provide a bacterial colonization surface equivalent to a football field. By adding a pump and a water return tube, you can create an aqua-terrarium (see diagram). HydroClay filters the water and prevents the pump from clogging.

Beneficial bacteria establish themselves in your drainage substrate. Some bacteria are capable of breaking down feces or plant waste. Bacteria play a role in the nutrient cycle of soils, notably by fixing nitrogen, thus contributing to soil fertility in your vivarium. With HydroClay, bacteria thrive around plant roots, where they live in symbiosis.

■ Reptiliège

Reptiliège is a set of cork bark that will allow you to create a natural setting in your terrarium or serve as a hiding place for your animals.

Cork is rot-proof and will therefore also be suitable for humid tropical environments. Reptiliège can also be used as a growth medium for epiphytic plants such as orchids. Contains: Natural cork bark.

Tropical Climate Substrates

■ **Reptasol**

Reptasol is a substrate made from pine bark especially for Terrariophila. It has a very pleasant odour that neutralises unpleasant odours.

Its acid PH (5 to 6) limits bacterial growth (no mould). The bark is washed and dusted.

This substrate is perfect for most terrariums, especially tropical terrariums.

But in the end many customers use Reptasol for their Pogona Vitticeps successfully.

Others use it for their T Herman, or T Horsfieldi ground turtle.

Tropical Climate Substrates

■ Coconut Chips

Coco Chips Litter 6L

SKU: RP890570

Coco Chips Litter 18L

SKU: RP890572

Coconut Chips Litter is a substrate of cleaned and sieved coconut chips. This ecological substrate is perfect for increasing the humidity in the terrarium and is completely safe for digging animals. Coconut Chips Litter is suitable for all tropical terrariums, including snakes (pythons, boas), lizards (water dragons, anolis, iguanas), amphibians, coconut crabs and hermit crabs. The coconut has the advantage of retaining moisture, and does not rot thanks to its low PH (5 to 6). It is a substrate of choice for plants that appreciate this nutritious, airy and healthy medium. Coconut chips are widely used in hydroponics.

- Keeps the terrarium floor moist but healthy.
- Provides a nutritious substrate for living plants.
- Increases humidity in terrariums.
- Ideal for any natural terrarium design.
- Absorbs unpleasant odours and is heat-sterilised.
- Economical and practical.

■ Coconut Chips Compressed

500 g of coconut chips mixed with 3 liters of water produces about **5 liters of substrate**.

4,5 kg of coconut chips mixed with 25-30 liters of water produces about **45 liters of substrate**.

Dry Climate Substrates

■ Repti Chanvre

« A highly versatile substrate. »

- Dust-free.
- Extremely soft.
- Absorbs odours.
- Highly absorbent.
- Biodegradable.
- Free of harmful oils and resins.

Repti Chanvre is a bedding for reptiles (tortoises, snakes, lizards), rodents (guinea pigs, hamsters, rabbits), and chickens (laying). Mechanically extracted and dusted before bagging,

Repti Chanvre litter is a pure, healthy and natural product. Very soft, it is suitable for the most sensitive species and newborns (used by professional breeders). Due to its high absorption rate (600%) and quick drying, this natural bedding requires little maintenance. Directions for use : Remove soiled litter daily and replace completely every eight weeks or as required.

■ Reptawood

« 100% natural beech wood chip. »

- 100% natural beech wood chip.
- Guaranteed free of dyes and chemicals.
- Recommended as bedding for snakes, lizards and tortoises.
- A very versatile substrate that can be washed, dried and dusted.
- Wood chips heavy enough to avoid being eaten by animals.

Its versatility also comes from the fact that it is washed and dust-free: it avoids respiratory and ophthalmic problems as we see too often with poor quality

Reptawood - 6 l

substrates. Reptawood is perfect for most tortoises. (T Hermannii, G Pardalis or Sulcata, T Horsfieldii), wheat snakes (E Guttata), or lizards (Gecko leopards, or Bearded Agames).

Dry Climate Substrates

■ Calcium Sand

Calcium Sand Kalahari
Red 5kg
SKU: RP875822

Calcium Sand Sechura
Natural 5kg
SKU: RP875826

Calcium Sand Colorado
Yellow 5kg
SKU: RP875828

Calcium Sand Atacama
Black 5kg
SKU: RP875830

- 100% natural sand. No additives, no colouring agents. Perfectly assimilable by most reptiles.
- Increases calcium intake and therefore limits intestinal occlusion problems when animals eat the substrate.
- Excellent substrate for bearded dragons, uromastyx, monitor lizards, geckos, tortoises (geochelones, etc...) and many other species.

CONTROLLER

Thermometers and Hygrometers

« Three devices for precise humidity measurement and temperature (external sensors). »

Small Hygrometer
SKU: RP875818

NEW DESIGN

Small Thermometer
SKU: RP875854

NEW DESIGN

Small Thermo-Hygrometer
SKU: RP875817

Our hygrometer has the Mini / Maxi function in order to record the differences between day / night or hot / cold spots.

Our Thermo-Hygrometer offers an all-in-one solution : temperature and hygrometry display in a single device, and for the price of a simple thermometer! It is now equipped with two separate sensors (hygrometry and temperature) for greater accuracy. Our Thermo-hygrometer has the Mini / Maxi function to record the differences between day / night or hot / cold spots.

Repti Easy Timer

Repti easy timer will allow you to control lighting, misting or heating. Easy Timer is a simple timer with which you can program in 15 minute periods.

Warning: This type of timer ends up shifting gradually.

Repti Easy Timer
SKU: RP875792

Repti Timer Pro

Repti Timer Pro is a fully electronic timer that will allow you to program periods «to the second». Essential for controlling a misting unit (Repti Rainforest), for which it is recommended to program spraying periods of 10 to 20 seconds.

Repti Timer Pro
SKU: RP875862

NEW DESIGN

Thermostat - Hygrostat

■ Easy Control

- Power : 800 W.
- High quality.
- High precision.
- Easy operation.
- Waterproof sensor.
- LED operation indicator.
- Replacable safety fuse.
- Ideal for terrariums and aquariums.

Thermostat Easy Control

SKU: RP875890

« Easy to use. »

■ Repti Heatcontrol

**Digital thermostat
with simple dial control**
for heating/cooling temperature

« Thermostat for controlling heating
or cooling devices in terrariums, with
an adjustable temperature range. »

Repti Heatcontrol

SKU: RP122420

The Repti Heatcontrol is a reliable thermostat for reptiles, designed to precisely control the temperature range of heating or cooling devices. Its modern LED display provides clear readability, while the convenient control dial makes adjustments easy. It stores your settings in case of a power outage and triggers a visual alarm if a problem occurs. Its waterproof probe ensures safety and durability in all terrarium environments.

By reproducing more natural and less abrupt temperature variations, the Repti Heatcontrol reduces thermal stress in reptiles and promotes behavior closer to their natural living conditions. Longer, less frequent heating cycles also improve the animal's overall comfort while preventing constant temperature fluctuations inside the terrarium.

Product advantages:

Traditional thermostats control heating/cooling devices by targeting a precise temperature. These devices typically have a sensitivity of about 1°C, resulting in rapid temperature fluctuations throughout the day due to repeated switching on and off of equipment. By using a wider temperature range with the Repti Heatcontrol—such as 2°C below and above the target temperature—you achieve longer but less frequent heating phases.

INCUBATION

■ Vermiculite

Humid tropical environment (hygro 65% to 100%).

Vermiculite is perfect for incubating the eggs of lizards, snakes, batrachians, insects...
It can also be useful for planting orchids.

SKU: RP550025

CARE PRODUCTS AND VITAMINS

Sepia bone

« Lizards and turtles need to have access to a permanent and easy-to-assimilate source of calcium. »

■ Calci Bone

- Natural source of calcium for all aquatic turtles, box turtles and tortoises.
- Calci Sepia Bone is a natural source of calcium for all types of aquatic turtles, box turtles and tortoises. Simply place Calci Sepia Bone in the turtle's vivarium so that the turtle can benefit from calcium « on demand ».

Instruction :

• **Aquatic turtles :** Calci Sepia Bone floats. Turtles will consume it according to their needs. Replace Calci Sepia Bone if it starts desintegrating and before it is entirely consumed.

• **Tortoises and box turtles :** Place Calci Sepia Bone in a dish or on the ground and leave it until it is consumed. Some turtles devour Calci Sepia Bone in a few days while others take months. These behaviors are normal as long as the turtles keep eating their normal food.

Calci Bone
(sepia bone)
SKU: RP890600

■ Calci Sepia Crushed

- Small pieces of sepia bone.
- Natural source of calcium and minerals.
- Excellent for turtles, lizards, rodents and birds.
- Small pieces adapted to reptile jaws.

Always make a dish of Calci Sepia Crush available to your pets to avoid calcium deficiencies that can result in metabolic bone disease (MBD).

Sepia is a high-quality calcium source for animals. It is a healthy products that is easily assimilated by birds and reptiles.

Simple pet supplement based on grossly crushed dry sepia bones.

Chemical analysis :

Ash content: 92%, including approximately 41% from calcium. Numerous marine mineral aggregates. 8% water.

Calci Sepia Crushed
100g (crushed sepia bone)
SKU: RP890602

■ Calci Sepia Powder

- Non processed extra fine powder of natural sepia bone.
- Natural source of calcium and minerals.
- Excellent for turtles, lizards, rodents and birds.

Sprinkle Calci Sepia Powder over insects or plants to avoid calcium deficiencies that can result in metabolic bone disease (MBD).

Calci Sepia Powder is a high-quality calcium source for animals. It is a healthy products that is easily assimilated by birds and reptiles.

Simple pet supplement based on finely powdered dry sepia bones.

Chemical analysis :

Ash content: 92%, including approximately 41% from calcium. Numerous marine mineral aggregates. 8% water.

Calci Sepia Powder
100g (powder sepia bone)
SKU: RP890604

Calcium blocks

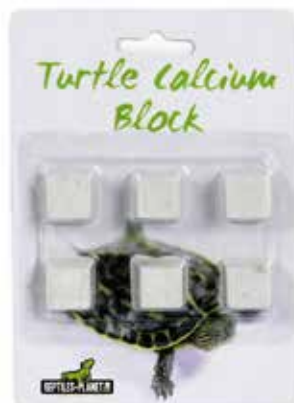

■ Tortoise Calcium Block

The Reptiles-Planet Tortoise Calcium Block provides your tortoise with a calcium, fiber (lucerne) and vegetable (carrot) supplement. Its unique composition is very easily digested and contributes to the growth of a healthy shell. Tortoise Calcium Block enables avoiding «Toblerone» shells and beak overgrowth. Depending on the size of the tortoise, a cube every 3 days is appropriate.

Tortoise Calcium Block

SKU: RP875988

■ Turtle Calcium block

The Turtle Calcium Block for Reptiles Planet Water Turtles is composed of a mixture of granules and a calcium base. The turtles will be quickly attracted and eat the calcium block as it begins to dissolve. Distribute one block per week.

- Prevents soft shell syndrome.
- Complements traditional food.
- Neutralises acidic water.

Turtle Calcium Block

SKU: RP875990

■ Turtle Safe

Instructions :

Place the Turtle Safe slow diffusion calcium block in your aquatic turtles aquarium water. The block then dissolves and treats the water by neutralizing chlorine, acids and heavy metals. It also frees calcium, which reinforces turtle shells.

NOTICE : Turtles need UVBs and heat to grow normally and to have a healthy shell.

Warning :

Keep out of reach of children.

Turtle Safe

Water neutralizer for aquatic turtles
SKU: RP875991

NUTRITION

Jelly for Insects and Lizards

Vita Jelly

For Lizards

Vita Jelly is an ideal food supplement for the nutrition of most lizards, including the iguanidae family (iguana, Anolis, etc...) and the Phelsuma family.

Most lizards lick fruit either on trees or on the ground when they are too ripe.

Vita Jelly provides them with a rich and balanced nectar (fruit, proteins, lactic acid, amino acids, vitamins and minerals).

Vita Jelly Red Fruit Lizard 10pcs
SKU: RP875920

Vita Jelly Banana Lizard 10pcs
SKU: RP875922

Vita Jelly protein Lizard 10pcs
SKU: RP875924

Vita Jelly Vitamin Lizard 10pcs
SKU: RP875926

Vita Jelly Mix Lizard 10pcs
SKU: RP875928

This natural jelly stand is designed so that lizards or other insects can come and feed on it. Its natural appearance gives the animal confidence. This support fits perfectly with Vita Jelly.

Repti Moss Ball
SKU: RP875932

For Insects

Vita Jelly Mix insects 10pcs
SKU: RP875930

Vita Jelly is an ideal food supplement for most insects, including member of the Coleoptera family (Cetonia, Dynastidae, Lucanidae, etc...) and the Julida family.

Beetles mostly feed on flowers, nectar and pollen. Vita Jelly provides a rich and balanced nectar

(fruit, proteins, lactic acid, amino acids, vitamins and minerals).

Sometimes, Vita Jelly increases the lifetime of the females as well as egg production.

Vita Jelly is commonly used to enrich insects before feeding them to lizards.

Jelly for Insects and Lizards

« Make your insects eat and drink before distributing them. »

■ Cricket Mix

CRICKET MIX is made in France from wheat bran and several cereals. It is a natural product. By feeding your insects (crickets, migratory locusts, flour worms, morios worms, cockroaches) with Cricket Mix you increase their nutritional value (vitamins and minerals). This product can be used in combination with « Natural Water ».

Cricket Mix - 500 ml

SKU: RP690550

« Practical & economical format. »

■ Natural Water

NATURAL WATER is a jelly for the watering of insects, tarantulas, scorpions, rodents and other small animals. It is possible to add vitamins and minerals to this jelly.

Natural Water - 500 ml

SKU: RP690551

Sprouting Seeds

■ Reptiseeds

- Perfect for all mediterranean and exotic tortoises.
- Seed mixture generating a genuine prairie that specifically meets the nutritional needs of tortoises (rich in fibers, vitamins and minerals).
- 100 g-packet to plant in the garden or the terrarium.
- Rich in fibers and dietary fibers.

Nutritional value :

Formula rich in essential amino acids and minerals. In addition, these plants help digestion while stimulating the production of bile (potassium salts, vitamins C, K, P).

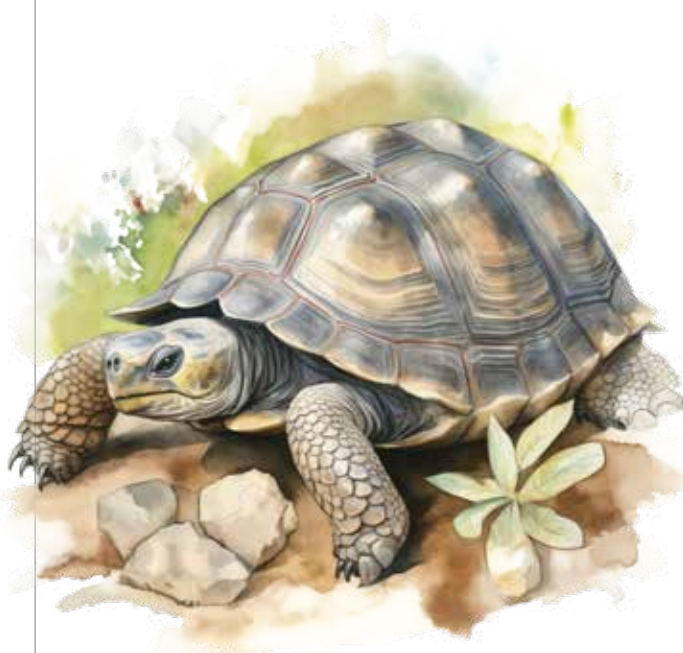

Instructions for use :

Outdoors: A 100-g pack should be spread over a surface of 4 to 25 m², depending on the desired density. Seeds should preferably be planted in the spring, but any other time between March and October is appropriate with regular watering. Broadcast seed over prepared soil.

In the vivarium: Use preferably with a substrate such as clay balls to facilitate seed sprouting. Pour water over the substrate and let it be absorbed. The humidity plants need will be slowly released. During the first 5 days, spray water once a day. Later, humidify only the substrate. You can then water using a mixture of water and organic fertilizer.

Contents :

White clover, crimson clover, sainfoin, lucerne, common vetch, dandelion, greater plantain, chicory, amaranth, larger bindweed.

Nutritional supplements

■ **Natural Extract**

« Two supplements that promote the intake of natural calcium. »

Natural Extract for Pogona

SKU: RP830165

Natural Extract for Tortoise

SKU: RP830160

Our natural plant extracts can be mixed regularly in the food of most lizards or herbivorous turtles, or partially herbivorous. Nutritional osteofibrosis usually occurs when one feeds his lizards with foods that have a poor phosphorus-calcium ratio (a lot of phosphorus, little calcium), but also when lighting is unsuitable (UVB).

Veterinarians advise giving foods that contain a level of Ca / P greater or equal than 1.5 (a concentration of at least 1.5 times more calcium than phosphorus).

Instructions for use : Start with small quantities to habituate your lizard or turtle. Dosage: half a teaspoon for a lizard ration several times a week.

Ingredients :

Natural Extract for Pogona : Unprocessed 100% natural ingredients : Plantain 40%, (Ca/P > 3.50), Dandelion 30% (Ca/P > 2.3), Alfalfa 30% (Ca/P > 6).

Natural Extract for tortoises : Unprocessed 100% natural ingredients : Plantain 40 %, (Ca/P > 3,50), Pissenlit 30% (Ca/P > 2,3), Opuntia 10% (Ca/p > 94), Aloe Vera 10%, Dichondra repens 10%.

■ Grass and leaves mix

« *Fighting nutritional osteofibrosis with natural supplements.* »

These leaves and flowers are naturally rich in calcium and low in phosphorus (Ca/p > 2). For example, alfalfa has a calcium/phosphorus ratio greater than 6. This mixture of dried herbs and flowers is to be mixed in the tortoise and lizard salad.

Ingredients : Calendula flowers (calendula) 20%, alfalfa (medicago sativa) 20%, plantain (plantago asiatica) 20%, dandelion (taraxacum officinale) 20%, rose flowers (rosa) 10%, true camomile flowers (Matricaria recutita).

Instructions for use : Nutritional supplement for tortoises and herbivorous lizards (Bearded agame, iguana, uromastyx, etc.). Pour some of the herb and flower mixture into a flat bowl and spray a little water to release the aromas.

Grass and leaves mix for Reptiles 300 ml
SKU: RP830180

HIDING PLACE

Replicas

Hiding places are an essential element in the composition of a terrarium. The lack of discreet places can be a source of stress for reptiles, which can lead to serious repercussions. Hiding places should be available in both the warm and

cold areas of the terrarium and should be adapted to the size of the animal. Hollow trunks are very popular with reptiles and blend very well in a natural terrarium.

■ **Coco Casa**
SKU: RP440140

We continue to increase the proportion of natural products for terrarium design. Coconuts with or without their bark will allow any reptile to hide (this is a very important primary need for their well-being).

Coconut Fiber Decor

Coco Branches

40 cm
SKU: RP440145

This branch made of Coco fiber is great for tropical terrariums. If it is sprayed regularly, it will get covered with a thin green moss.

Repti Liana

SKU: RP440130

This articulated Liana is covered with natural coconut fiber. Convenient for arboreal lizards such as chameleons.

Natural Terrarium Decorations

Natural Lianas

In addition to making your vivarium more attractive, decorations and other habitat elements create different spaces your animals can inhabit. Textured backgrounds, lianas, roots and plants become hiding places, shelters or places to lay eggs. Natural lianas are ideal decorative elements for your terrarium. They enable tree-dwelling reptiles to climb like they would in a natural setting. Offering your reptiles a variety of lianas with different diameters, lengths and shapes is a way to look after their well-being.

■ Pinky Pump

Feeding pump for baby snake

PINKY PUMP

Pinky Pump was invented by professional breeders that were used to elaborating mixtures to feed reluctant young snakes. Inserting a young mouse in the Pinky Pump, the snake can be fed directly. The pump limits the likelihood of regurgitation by decreasing the young snake's stress level.

The glass of the Pinky Pump may break during use. A spare part is available.
